PROFILE

Guinness World Record participant in the largest Artificial Intelligence video lesson through the KANZ AI program, demonstrating my commitment to continuous learning and emerging technologies. I am an Information Technology graduate with over two years of professional experience in software development, systems support, data analysis, and enterprise data management. Since April 2024, I have worked at Nextvijo Software Solutions, where I design, deploy, and maintain business information systems while providing technical support and database administration. I also work remotely as a Data Curator and Data Analyst at Veeva Systems, performing data validation, quality assurance, research, and analysis on enterprise healthcare datasets. Combined with my industrial training at Nairobi City Water & Sewerage Company, I have built strong expertise in IT support, troubleshooting, database management, cloud technologies, and delivering reliable technology solutions.

EDUCATION

Mount Kenya University, *Bachelors of Science in information Technology* 2022 – 2025 | Thika

Mount Kenya University Bachelor of Science in Information Technology 2022 – 2025 | Thika, Kenya

Second Class Honours (Upper Division)

- Relevant Coursework: Software Development, Database Systems, System Analysis & Design, Computer Networks, Distributed Systems, Mobile Application Development, Operating Systems, Software Engineering, Information Security, Data Structures & Algorithms, Web Technologies, Computer Architecture, Artificial Intelligence, Cloud Computing, Human-Computer Interaction, ICT Project Management.
- Acquired practical knowledge in software development, database administration, systems analysis and design, networking, enterprise IT support, information security, and cloud technologies.
- Developed strong analytical, problem-solving, and technical documentation skills through individual and team-based academic projects.
- Successfully designed and implemented multiple real-world software solutions, including healthcare, inventory management, AI-powered, and mobile applications as part of coursework and professional practice.
- Proficient in Microsoft Office Suite (Word, Excel, PowerPoint, Access), database management, software development tools, and modern development frameworks.

SKILLS

Programming Languages: Python, JavaScript, Java, SQL

Systems & IT Support: System Installation & Configuration, Technical Support, Hardware & Software Maintenance, System Troubleshooting, User Support

Networking: LAN/WAN Fundamentals, TCP/IP, Network Configuration & Troubleshooting

Databases: MySQL, PostgreSQL, MongoDB, SQL Database Management, Database Backup & Recovery

Data Analysis & Reporting: Data Analysis, Data Validation, Data Quality Assurance, Microsoft Excel, Power BI

Software Development: React, React Native (Expo), Node.js, Express, Flask, REST API Development

Frontend: HTML, CSS, Tailwind CSS, Responsive UI Design

Backend & APIs: API Design, Authentication, Server Logic, Integration Services

Tools & Platforms: Git, GitHub, Postman, VS Code, Vercel, Render, Cloud Deployment

PROFESSIONAL EXPERIENCE

Nextvijo digital solutions	04/2024 – Present
Co-Founder & Systems Support / Full-Stack Developer	
• Designed, deployed, and maintained business information systems for multiple clients. • Installed, configured, and maintained software applications on client computers and servers. • Diagnosed and resolved software, hardware, and network-related issues. • Provided technical support and user training after system deployment. • Managed MySQL and MongoDB databases including backup, restoration, and optimization. • Configured REST APIs and backend services for business applications. • Performed system testing, upgrades, troubleshooting, and preventive maintenance. • Worked closely with clients to gather requirements and implement system improvements. • Maintained application security, user roles, and access control. • Prepared technical documentation and user manuals.	
Nairobi city water and sewerage company, IT Assistant	04/2025 – 12/2025 Nairobi
• Installed and configured computer hardware, software, and peripheral devices. • Assisted users in troubleshooting hardware, software, and network connectivity issues. • Supported routine maintenance of organizational IT systems. • Assisted in network monitoring and basic server administration. • Performed preventive maintenance and software updates. • Assisted with user account management and system configuration.	

- Participated in resolving day-to-day IT support requests.

Veeva systems, Data Curator & Data Analyst

12/2025 – 06/2026 | Remote

• **Six months contract with veeva systems**

•

- Perform data curation, validation, and quality assurance on large healthcare and life sciences datasets to ensure accuracy, consistency, and compliance with company standards.
- Analyze and verify data from multiple trusted sources to maintain high-quality enterprise databases.
- Identify, investigate, and resolve data inconsistencies through detailed research and validation processes.
- Conduct data cleaning, transformation, and enrichment to improve data integrity and usability.
- Utilize analytical techniques to identify trends, anomalies, and missing information within datasets.
- Collaborate with global teams to meet quality targets and project deadlines while maintaining strict accuracy standards.
- Generate reports and insights that support data-driven decision-making and continuous process improvement.
- Maintain confidentiality and comply with organizational data governance and quality assurance policies.

PROJECTS

Basket Hub – E-commerce Ordering & Delivery Platform

07/2026 – 07/2026

- Designed and developed **Basket Hub**, a full-stack e-commerce platform that enables customers to browse products, place orders online, and track deliveries.
- Implemented secure user authentication, product management, shopping cart functionality, order processing, and an intuitive user interface.
- **Recognized by KANZ AI** for innovation and practical application of AI and modern software development technologies.

POS & Inventory Management System

Technologies: React, Node.js, Express, MySQL

Developed a Point of Sale and Inventory Management System for a wholesale business to manage sales transactions, stock levels, suppliers, purchases, and financial reports. Implemented role-based user access, automated inventory tracking, sales reporting, and low-stock alerts, significantly reducing manual record-keeping while improving operational efficiency.

GradePoa – Student Learning Management Platform

Developed an online learning and revision platform that enables university students to access course materials, revision papers, quizzes, and performance analytics. The system includes user authentication, progress tracking, interactive dashboards, and centralized content management to enhance student learning and academic performance.

AI Smart Pest Detection System (Kinga App)

Technologies: React Native, React, Flask, PyTorch, OpenCV, MySQL

Developed an AI-powered mobile and web application that assists farmers in identifying crop pests using image recognition technology. Integrated a Convolutional Neural Network (ResNet18) model to provide real-time pest detection, treatment recommendations, multilingual support, and accessibility features, helping farmers make informed crop management decisions.

Hospital Management System

Designed and developed a comprehensive hospital management system that streamlines hospital operations by managing patient registration, appointments, consultations, admissions, billing, pharmacy, laboratory services, and medical records. Implemented secure user authentication, role-based access control, and centralized patient data management to improve efficiency and ensure accurate record keeping. The system is currently in active use by healthcare professionals.

Rental Management & Billing System

Built a web and mobile rental management platform that allows landlords to manage properties, tenants, rent payments, maintenance requests, and billing from a centralized dashboard. Integrated automated rent reminders, payment tracking, financial reporting, and tenant account management, reducing manual rent administration and improving payment compliance.

Hospital Appointment & Booking System

Developed an online hospital appointment booking platform that enables patients to register, book appointments with doctors, receive appointment confirmations, and monitor appointment status. The system includes doctor scheduling, appointment management, patient records integration, and an administrative dashboard to improve service delivery and reduce patient waiting times.

ACHIEVEMENTS

- **Guinness World Record Participant (2026)** – Successfully participated in the **KANZ AI** event that achieved the Guinness World Record for the **Most Users in an Artificial Intelligence Video Lesson**, demonstrating commitment to continuous learning and advancing AI skills.
- **KANZ AI Recognition** – Received recognition from KANZ AI for developing **Basket Hub**, an innovative online ordering and delivery platform.
- Co-founded **Nextvijo Software Solutions** and successfully delivered production-ready business systems currently in active use by clients.
- Developed and deployed production-ready software solutions at **Nextvijo Software Solutions**.
- Designed, developed, and deployed **6+** web and mobile applications across healthcare, retail, education, agriculture, and property management sectors.
- Successfully implemented hospital management, appointment booking, POS, inventory, and rental management systems that digitized manual operations and improved organizational efficiency.
- Developed and integrated an AI-powered crop pest detection solution, enabling real-time pest identification and treatment recommendations for farmers.
- Delivered end-to-end software solutions, including requirements analysis, system design, development, testing, deployment, user training, and post-deployment support.
- Managed relational and NoSQL databases, implementing secure authentication, role-based access control, and data integrity measures across multiple systems.
- Deployed and maintained cloud-hosted applications using modern deployment platforms and version control tools, ensuring system availability and reliability.
- Performed enterprise IT support during industrial attachment at Nairobi City Water & Sewerage Company, gaining hands-on experience in system maintenance, troubleshooting, and network support.
- Maintained high standards of data quality and accuracy as a **Data Curator & Data Analyst** at **Veeva Systems**.
